

NO TO WESTERN COMPLICITY IN THE CONGO SIT-IN PROTEST AT GEORGE SQ

Thu 16 Feb 12 noon

The Democratic Republic of Congo is one of the richest countries in the world for natural resources, such as gold, diamonds and coltan. Yet the people of Congo are among the poorest on earth.

The war in DR Congo continues and has already killed eight million people, nearly half of whom were children. More than 300,000 women have been raped in the past 20 years. On average, 48 women are raped every day, giving DR Congo the unenviable status of being the rape capital of the world.

Human rights violations, corruption and extra-judicial killings are endemic.

To end this unacceptable situation, our people overwhelmingly chose Etienne Tshisekedi as their president in the national elections in November last year, despite the documented widespread fraud carried out by outgoing "president" Joseph Kabila.

We demand the authorities respect the Congolese people's democratic will and call on world leaders to end their complicity with the dictator Kabila.
